Alumicen spray

Spray for cutaneous use Micronized aluminium

COMPOSITION:

Micronized aluminium..... 2.4 g
Excipients..... 200 ml

PROPERTIES:

Alumicen Spray is applied locally as an aerosol. This method of administration allows the aluminum powder to completely cover all the irregularities of the wounds. Aluminum does not penetrate the cells and remains at the level of the membranes, so that the cells reduce their permeability but remain viable.

TARGET ANIMAL SPECIES:

Swine, cattle, sheep, horses, poultry, rabbits, dogs and cats

POSODOLOGY AND ADMINISTRATION VIA:

Apply a thin layer of product on the surface of skin to protect, keep the spray at a distance of about 20 cm.

Cutaneous use.

PRESENTATION:

Spray containing 270 ml (120 g net content).

VETERINARY USE
